

# A new dimension in bathing

The original shower-bath

**Artweger**  
**TWIN:LINE**  
from Eurocare

# The best of both worlds

The brainchild of Austrian manufacturer Artweiger, Twinline created new innovation in bathroom design. Combining a bath and shower in one, Artweiger eliminated the need to choose between the two, even when space was an issue. This winning combination also meant catering for differing preferences within the household, by offering the best of both worlds.

Available in three conventional bath sizes, Twinline provides the comfort and relaxation of a full bath, with the freedom and practicality of a shower. The compact design maximises the effective use of space and can fit into the smallest of bathrooms.

## Offering the ultimate in technology and design, Twinline is the all-inclusive bathroom solution.

Suitable for all the family, young and old, Twinline could not be simpler to use. With a low threshold and one-piece inward opening door, the bath is easy to access and the door locking mechanism is uncomplicated and prevents accidental opening during bathing. The practical benefits are equally balanced by Twinline's individual style, with a range of contemporary glass, tiled and plastic panels to choose from – Twinline has it all.

Discover for yourself a new dimension in bathing with an Artweger Twinline from Eurocare.

# Which Twin:Line to choose?

Artweger was the original inventor of the shower-bath, which introduced a new concept to bathroom design. In recent years the original concept has attracted many imitators,

bringing about a new challenge for the future. Twinline 2 is the culmination of years of ongoing development, backed by Artweger's belief that good design should be more universally available.

## Twin:Line – The original shower-bath.

With its elegant look and unique features the original Twinline remains a popular choice for users and specifiers alike. The contoured design provides additional space and room to manoeuvre, whilst the integrated seat and headrest offers additional comfort and support. The original model also features an electronic waste and locking mechanism, activated by level sensors that ensure the door remains locked until the water has drained.

Classic Twinline demonstrates the perfect combination of engineering and style.

- Bath manufactured in GRP
- 1800mm model available in two styles
  - rounded or square end
- Shower door finish available in chrome
- Shower door manufactured in 6mm safety glass
- Electronic waste and door locking mechanism
- Integral seat and headrest, detachable for cleaning, available in white or silver
- Integrated shower guide rail for spray control

## Twin:Line 2 – stylish and compact.

With extra compact dimensions and contemporary design at its core, Twinline 2 will appeal to a greater number of people. With a stylish modern twist on the original design the straight glass shower door allows the bath to squeeze into the smallest of spaces, whilst the internal dimensions of the showering area have been widened for additional comfort. The new model also features a deeper tub and a mechanical waste and locking mechanism, making it easier and cheaper to install.

Twin:Line 2 provides the ultimate in good design.

- Bath manufactured in acrylic
- Straight, symmetrical design for even more compact spaces
- Shower door manufactured in 8mm safety glass
- Mechanical waste and door locking mechanism
- Easy grip shower door handle
- Reduced entry height
- Optional seat available
